Tim Timmermann - EPA, Project Reviewer
Alexander Peterson - Regulatory, Cape Cod Commission
Steve McKenna – Massachusetts Executive Office of Energy and Environmental Affairs

FERC Environmental staff met with representatives from federal, state, and local agencies; and Algonquin Gas Transmission, LLC (Algonquin) via teleconference to discuss the planned Cape Cod Canal Bridge Relocation Project in Massachusetts.

Update of the project status:

- Algonquin will be changing the Project name to avoid confusion with the larger Cape Cod Canal Bridges Program to replace the existing Bourne and Sagamore Bridges, lead by MassDOT and Federal Highway Administration.
- Phase I cultural surveys are ongoing, vernal pool surveys were completed last week, wetland/waterbody surveys on track for end of April/early May, habitat assessments early June pending MassWildlife's Natural Heritage & Endangered Species Program protocol approval.
- Route is being adjusted as Algonquin works with agencies, utility companies, landowners, etc.

Environmental review and upcoming milestones:

- FERC staff to issued comments on initial draft resources reports 1 and 10 on March 20, 2025.
- FERC staff issued the Notice of Scoping on April 3, 2025. A scoping session in the project area is planned for April 23, 2025.

The next call is scheduled for Tuesday, April 29, 2025.
